KNOW-HOW

IMAGINATIVE PRODUCTS LEAD TO PROFITS.

Experience is the Best Teacher.

In the opinion of many experts, the professionals at Crown Polymers are the most experienced and knowledgeable of any in the world-wide polymer industry.

Crown is unique among competitors because of product quality, in-depth technical experience, and its unmatched capacity for providing customers with the sales, marketing, & technical support needed to make virtually any decorative, commercial, industrial, residential or institutional project a profitable reality.

In addition, Crown Polymers' technical and management teams regularly share new product concepts and techniques, along with valuable marketing insights, with clients who attend the company's highly effective Crown Polymer College™.

Crown products are ideal because they offer advantages such as monolithic bond to concrete, high-temperature protection to 450°F as well as ADA & OSHA slip resistant compliance, they are cost effective at the outset, and provide many years of virtually maintenance free life while retaining their original luster. Crown's products have no VOCs, are LEED® "Green" and assist with implementation of sustainable strategies.

Crown Polymers shares its know-how about how to sell its full line of floor overlay products at the Crown Polymer College™. Call today for information.
