

**Floyd Dimmick Sr.**, Technical Director  
Crown Polymers, LLC., Huntley, Illinois

"At Crown Polymers, we pride ourselves in providing the best customer service and technical support available. For example, we offer a free whitepaper series on our website to assist contractors with common issues ranging from amine blush to overlay placement in elevated temperatures. Errors cost money, so it's our goal to make sure that contractors have the knowledge they need to be as profitable as possible."

Gain access to our whitepapers at:

Whitepaper Series available online

# KNOWLEDGE IS KING

MAKE THE RIGHT MOVE WITH CROWN SYSTEMS

## Reduce Risks With Help From The Experts.

Much like the game of chess, mistakes are there, waiting to be made. Crown Polymers' team of experts assist specifiers & contractors with sustainable strategies, extensive product knowledge & unparalleled technical support.

CrownCrete™ is a modified novolac polymer concrete floor overlay, ideal for wet conditions such as those found in food, meat & poultry processing plants, beverage bottling facilities, industrial & pharmaceutical manufacturing environments. CrownCrete™ provides a safe & easy-to-clean environment.

CrownPro™ SparkShield, with CrownLiquidCopper™ Primer, introduces the newest improved generations of static dissipating and conductive floor overlays.

CrownFlake™ is a decorative vinyl flake overlay ideal for commercial, industrial, institutional & educational environments where a beautiful, durable surface is desired.

For additional antimicrobial protection, add CrownSilver™ to all overlays and topcoats. Silver-ion technology eliminates the growth of bacteria, viruses & fungi on floor surfaces.

In addition, Crown systems are ADA slip-resistant compliant, LEED® Green and nearly maintenance free.

## CrownSilver™ Escherichia coli Test Results.
