

Crown Polymers Press Releases 2008

CrownPro™ AcidShield Superior Acid Protection.

Date: November 2008

Publications: *CoatingsPro Sourcebook 2008, Concrete Decor, Concrete Surfaces, Journal of Architectural Coatings, Journal of Protective Coatings & Linings*

If you have a tough problem to solve, where acid spills are a headache, Crown's AcidShield is the answer. This two component 100% solids novolac product provides superior acid protection as an epoxy coating or an epoxy polymer concrete. Low odor, easily applied CrownPro™ AcidShield is ideal for use on floors and secondary containment areas. Crown Polymers experts can assist by providing guidance and technical support that will help assure proper application and maximum product effectiveness, and is LEED® Green Compliant.
