

Crown Polymers Press Releases 2009

Finish First With CrownCove™! Less Down Time Means Increased Productivity!

CrownCove™ Specifications

Date: April 2009

Publications: *CoatingsPro, Concrete Decor, Concrete Surfaces, Journal of Architectural Coatings, Journal of Protective Coatings & Linings, Jobsite Concrete Surface Prep/Repair & Coatings*

CrownCove™ is easy to install on curved, straight or irregular wall surfaces. The precast polymer floor-to-wall cove system is ideal for commercial, retail, institutional & industrial applications.

When overlaid with polymer cementitious overlay products, CrownCove™ prevents water, dirt, bacteria, chemicals and cleaning solutions from seeping into the floor-to-wall juncture, resulting in sanitary and easy to maintain floors.

The cove system is available in 1, 4, 6 and 8 inch heights with inside and outside corners. CrownCove™ is decorative & industrial tough, has no VOCs, is LEED® "Green" and assists sustainable strategies.
